

Soli Coin (SOLI) Whitepaper

Version: v1.1 | Network: Ethereum (ERC-20)

Abstract

Soli Coin (SOLI) is a utility token created on the Ethereum blockchain with a humanitarian foundation at its core. The project is dedicated to supporting a young girl named Soliha, who is battling cerebral palsy (CP). Beyond raising funds for her treatment, Soli Coin envisions building a global blockchain-based financial ecosystem designed to bridge the gap between cryptocurrency, charity, and real-world use cases.

Through the integration of decentralized finance (DeFi), NFTs, DAO governance, and custom blockchain solutions, Soli Coin seeks to transform philanthropy into a transparent, verifiable, and sustainable ecosystem that empowers both individuals and communities worldwide.

1. Executive Summary

The cryptocurrency market has proven its potential to revolutionize financial systems globally. However, very few projects directly tie blockchain technology to **tangible human impact**. Soli Coin introduces a **purpose-driven token** that begins with a simple but profound mission: to support Soliha's medical care. From there, the ecosystem expands into building decentralized applications (dApps), NFT marketplaces, payment solutions, and eventually, a dedicated blockchain — **SoliChain**.

Soli Coin is not just a digital asset; it is a **symbol of compassion, transparency, and innovation**. By leveraging blockchain, we provide verifiable proof of fund allocation, liquidity transparency, and community-led governance — setting new standards for trust in charity-based crypto initiatives.

2. Mission & Vision

Mission

- Raise immediate funds for Soliha's treatment and long-term care.
- Create a **transparent, decentralized charity model** that the world can trust.
- Empower a global community to contribute meaningfully using blockchain.

Vision

- Establish Soli Coin as the **leading humanitarian cryptocurrency**, dedicated to bridging philanthropy and decentralized finance.
- Build an ecosystem where SOLI is used for **money transfers, merchant payments, NFTs, and DAO governance**.
- Launch **SoliChain**, a blockchain designed specifically for social impact and charitable giving, ensuring transparency and accessibility.

3. Technology Overview

Core Infrastructure

- **Blockchain:** Ethereum Mainnet
- **Token Standard:** ERC-20
- **Smart Contract Language:** Solidity
- **Wallet Support:** MetaMask, Trust Wallet, Ledger, Coinbase Wallet, etc.
- **Smart Contract Address:** [0x0EAdDCBe240d7Eeb1bA21f1EED48E58293969c6e](https://etherscan.io/address/0x0EAdDCBe240d7Eeb1bA21f1EED48E58293969c6e)

NFT Marketplace Integration

The Soli ecosystem will include an **NFT marketplace**, where artists, creators, and supporters can mint, buy, and sell NFTs. A percentage of transaction fees will go directly to the **Soliha Medical Fund** and other charitable causes.

Security Architecture

- Third-party audits (Hacken, Certik, etc.)
- Liquidity lock via Unicrypt or Team Finance
- Multisig wallets for medical funds
- On-chain transparency dashboards

4. Tokenomics

Total Supply: 202,104,150 SOLI

Allocation	Percentage	Amount (SOLI)	Vesting/Lockup
Soliha Medical Fund	10%	20,210,415	Transparent Wallet + Reporting
Liquidity (DEX)	20%	40,420,830	Locked via Unicrypt/Team Finance
Marketing	10%	20,210,415	6-month linear unlock
Team	15%	30,315,622.5	Locked 12 months, 24-month vesting
Ecosystem Growth	20%	40,420,830	Reserved for staking, dApps, NFT rewards
Reserve Fund	25%	50,526,037.5	Treasury, strategic partnerships

Key Features:

- Deflationary token model under consideration (burn mechanisms).
- Community staking and rewards programs.
- Governance rights via DAO.

5. Use Cases

- **Transparent Fundraising:** Verifiable donations for Soliha and future causes.
- **Payment Utility:** Currency for SoliApp, SoliPay Gateway, and NFT marketplace.
- **DAO Governance:** Token holders vote on ecosystem decisions.
- **Rewards & Staking:** Earn incentives for holding SOLI.
- **NFT Integration:** NFT minting, trading, and charity collections.
- **DeFi Applications:** Yield farming, liquidity pools, and partnerships.

6. Roadmap

Phase 1 – Foundation (Q3 2025)

- Token deployment & smart contract verification
- Launch of official website & social media channels
- Initial fundraising for Soliha's medical treatment

Phase 2 – Growth (Q4 2025)

- DEX listing (Uniswap)
- Community airdrops
- CoinGecko and CoinMarketCap applications
- First NFT charity collection

Phase 3 – Expansion (Q1–Q2 2026)

- Mobile app prototype (SoliApp) for money transfers
- Alpha launch of SoliPay Gateway

- DAO setup for governance
- NFT marketplace launch

Phase 4 – Ecosystem (Q3 2026–2027)

- Strategic partnerships with charities & businesses
- Staking & DeFi integrations
- SoliChain development (custom blockchain)

7. Security & Trust

- **Public & Audited Smart Contract** – Full code verification.
- **Liquidity Lock** – Guaranteed trust via third-party lock.
- **Multisig Wallets** – Medical fund and treasury protection.
- **Transparent Reporting** – Quarterly updates on fund usage.

8. Ecosystem Goals

- **SoliApp**: Cross-border money transfers in crypto & fiat.
- **SoliPay Gateway**: Merchant & charity crypto payment solution.
- **NFT Marketplace**: For creators, charities, and collectors.
- **SoliChain**: Future blockchain for social impact & transparency.

9. Governance & Community

- **DAO Governance:** Community-driven proposals and voting.
- **Engagement Programs:** Social rewards for active participation.
- **Creator & Developer Grants:** Fund innovation within the Soli ecosystem.
- **Impact Reports:** Proof-of-charity model showcasing real-world results.

10. Legal & Compliance

- **Regulatory Considerations:** Project aligned with global KYC/AML standards for financial operations.
- **Non-Security Token Classification:** SOLI is positioned as a utility token.
- **Transparency:** Legal entity and compliance disclosures before centralized exchange listings.

12. Conclusion

Soli Coin is more than just a token — it is a **movement for hope and impact**. By combining blockchain transparency, NFT innovation, and decentralized governance, the project empowers individuals worldwide to create lasting change. What begins with helping Soliha will grow into a **global ecosystem where compassion and technology unite**.
